Who is a candidate for VNSNY Home Care?

An ED patient with one or more of the following characteristics can benefit from home care:

- Difficulty ambulating independently
- Limited assistance at home from family or other informal caregivers
- Hospitalization or ED visit from any hospital within the past six months
- Self-rated health as fair or poor
- Shortness of breath
- Risk of falls
- Depression or cognitive impairment
- Advanced illness with need for hospice and palliative care
- Multiple comorbidities such as heart disease, hypertension, asthma, COPD or diabetes

For more information or to refer a patient, please contact your VNSNY representative.
What are the benefits of VNSNY Home Care?

VNSNY can help ensure that your patient follows the post-discharge plan of care, resulting in:

• Increased patient adherence with medication management
• Fewer “revolving door” ED patients
• Fewer unplanned hospital admissions and readmissions
• Increased patient satisfaction

VNSNY also offers private pay home care from Partners in Care, including ambulatory escort at discharge, skilled nursing or personal care.
